INDEPENDENT AUDITORS' REPORT

Honorable Darrell Stephens, Mayor and Members of the City Council City of Abernathy, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Abernathy, Texas, as of and for the year ended September 30, 2007, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Abernathy, Texas' management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Abernathy, Texas, as of September 30, 2007, and the respective changes in financial position and cash flows where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated January 7, 2008, on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's discussion and analysis and budgetary comparison information on pages 3-8 and 28, respectively, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Abernathy, Texas' basic financial statements. The additional schedules as listed in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The additional schedules as listed in the table of contents have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

CITY OF ABERNATHY MANAGEMENT'S DISCUSSION AND ANALYSIS

January 7, 2008

Honorable Mayor, City Council Members and Citizens of the City of Abernathy, Texas,

This section of Abernathy's annual financial report presents our discussion and analysis of the City of Abernathy's financial performance during the fiscal year that ended on September 30, 2007. Please read it in conjunction with the City's financial statements and independent auditors' report.

FINANCIAL HIGHLIGHTS

The assets of the City exceeded its liabilities at the close of the most recent fiscal year by \$5,071,884 (net assets) as compared to \$5,064,696 for the previous fiscal year. Of this amount, \$761,023 (unrestricted net assets) may be used to meet the City's ongoing obligations to citizens and creditors.

The City's total net assets increased by \$7,188 as a result of this year's operations as compared to an increase of \$177,545 in the previous year.

During the year ended September 30, 2007 and 2006, the City's expenses were \$1,781,082 and \$1,960,258, respectively, compared to \$1,788,270 and \$2,137,803 generated in taxes and other revenues.

The balance of cash and investments at September 30, 2007 and 2006, were \$706,404 and \$953,968, respectively.

Expenditures

Total fund expenditures for the year ending September 30, 2007, compared with the year ending September 30, 2006, are as follows:

Expenditures

<u>Fund</u>	2006-2007	2005-2006		Change
General Fund	\$ 1,477,947	\$ 1,527,559	\$	(49,612)
Water/Sewer Fund	633,949	582,156		51,793
Airport Fund	16,764	18,854		(2,090)
Total	\$ 2,128,660	\$ 2,128,569	\$_	91

The decrease in General Fund expenditures is largely attributable to the decrease in Home Grant expenditures. The increase in the Water/Sewer Fund is attributable to increases in salaries and utility maintenance.

Revenues

The City's revenues were down for the year ending September 30, 2007, when compared with the year ending September 30, 2006. Year-end revenue totals are as follows:

Revenues

Fund	2006-2007	2005-2006	Change
General Fund	\$ 1,194,967	\$ 1,518,388	\$ (323,421)
Water/Sewer Fund	576,054	620,803	(44,749)
Airport Fund	9,022	4,426	4,596
Total	\$_1,780,043_	\$ <u>2,143,617</u>	\$ (363,574)

The decrease in Fund revenues is largely attributable to grant revenues received for Home grant expenditures in the previous year.

OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of a series of financial statements and notes to those statements. The statements are organized so the reader can understand the City as a whole and then proceed to provide an increasingly detailed look at specific financial activities.

The government-wide financial statements include the Statement of Net Assets and the Statement of Activities. These provide information about the activities of the City as a whole and present a longer-term view of the City's property and debt obligations and other financial matters. They reflect the flow of total economic resources in a manner similar to the financial reports of a business enterprise.

Fund financial statements report the City's operations in more detail than the government-wide statements by providing information about the City's most significant funds. For governmental activities, these statements tell how services were financed in the short-term, as well as what resources remain for future spending. They reflect the flow of current financial resources and supply the basis for tax levies and the appropriations budget.

The notes to the financial statements provide narrative explanations and additional data needed for full disclosure in the government-wide statements and the fund financial statements.

Reporting the City as a Whole

Government-Wide Financial Statements

The analysis of the City's overall financial condition and operations is presented in the Statement of Net Assets and the Statement of Activities. Its primary purpose is to show whether the City is better off or worse off as a result of the year's activities. The Statement of Net Assets includes all the City's assets and liabilities at the end of the year while the Statement of Activities includes all the revenues and expenses generated by the City's operations during the year. These statements apply the accrual basis of accounting which is the basis used by private sector companies.

All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid. All the City's assets are reported whether they serve the current year or future years. Liabilities are considered regardless of whether they must be paid in the current or future years.

These two statements report the City's net assets and changes in them. The City's net assets (the difference between assets and liabilities) provide one measure of the City's financial health, or financial position. Over time, increases or decreases in the City's net assets are one indicator of whether its financial health is improving or deteriorating. To fully assess the overall health of the City, however, you should consider non-financial factors as well, such as changes in the City's infrastructure, its property tax base and the condition of the City's facilities.

In the Statement of Net Assets and the Statement of Activities, the City is reporting its governmental activities which include water, sewer, vector control (mosquito spraying) and garbage collection.

Reporting the City's Funds

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds – not the City as a whole. Laws and contracts require the City to establish some funds. The City's administration establishes many other funds to help it control and manage money for particular purposes. The City's two fund types – governmental and proprietary – use different accounting approaches.

- Governmental funds Most of the City's basic services are included in governmental funds. These use modified accrual accounting (a method that measures the receipt and disbursement of cash and all other financial assets that can be readily converted to cash) and report balances that are available for future spending. The governmental fund statements provide a detailed short-term view of the City's general operations and the basic services it provides. We describe the differences between governmental activities (reported in the Statement of Net Assets and the Statement of Activities) and governmental funds in reconciliation schedules following the fund financial statements.
- Proprietary funds The City's business activities such as water sales, sewer services, and airport
 operations are included in proprietary funds. These also use modified accrual accounting in
 reconciliation schedules following the fund financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Our analysis focuses on the net assets (Table 1) and changes in net assets (Table 2) of the City's governmental and business-type activities.

Changes in Net Assets

Net assets of the City's governmental and business-type activities increased from \$5,064,696 in 2006 to \$5,071,884 in 2007. Unrestricted net assets – the part of net assets that can be used to finance day-to-day operations without constraints established by debt covenants, enabling legislation, or other legal requirements – decreased from \$1,006,302 to \$761,023.

Net Assets at September 30, 2007	\$_	5,071,884	\$	5,064,696

The City's total revenues decreased from to \$2,137,803 in 2006 to \$1,788,270 in 2007, a decrease of \$349,533. This decrease was attributable to Home grant revenue received in the previous year. The total expenditures of the City decreased by \$179,176 from \$1,960,258 to \$1,781,082, a result of more fixed asset purchases which are capitalized.

Other factors impacting the City's financial position include the following:

- The purchase of vehicles in the Fire, and Water Departments.
- The ongoing work on the Community Park.
- Mobilization of the Downtown Revitalization Project.
- Building Repairs at both the Clinic and Post Office.
- Street Sign Replacements.
- Motorgrader Purchase.
- Capital Improvements at Antelope Meadows.
- Sewer System Repairs.

Fund Balances

The City's total Governmental Funds fund balance at September 30, 2007 and 2006, was \$118,635 and \$236,838, respectively. This fund balance is reported in the General Fund. The General Fund balance of \$118,635 is available for current spending; however, it has been the practice of the City to try and maintain a fund balance that is at least several months operating expenses.

Budgetary Highlights

Over the course of the year, the City Council revised the City's budget. These budget amendments were necessary to reflect the revised estimates of revenues and expenses. The principal amendment was construction expenditures allowing for various grants the City received during the year.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

At the end of 2007, the City had \$4,588,488 of capital assets, net of accumulated depreciation. Financial statement footnote 2 discloses the capital asset activity of the City for the fiscal year ending September 30, 2007.

Debt

At the end of 2007, the City had \$359,925 of total debt outstanding. \$140,936 of this is due within one year. The funding for the payment of the capital leases comes from general revenues and funding for the payments on the bonds come from water utilities collected for debt repayment. Financial statement footnote 3 discloses the debt activity of the City for the fiscal year ending September 30, 2007.

FACTORS BEARING ON THE CITY'S FUTURE

Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the City operates.

Local economy. The City of Abernathy is a largely residential city that has a commercial section along Interstate 27. Both the City's General and Water/Sewer Funds rely heavily on revenues received from all sectors of the community. Lubbock has started moving forward with their industrial park located just 10 minutes south of Abernathy. With the high number of projected jobs to be created this close to our community, the City began working with a local developer to provide new home sites in hopes to attract a portion of that job base to Abernathy.

The General Fund's three largest revenue sources, which are sales tax, property tax and franchise fees, make up 48% of the revenues, and all three have performed well over the last several years. For fiscal year 2007-08, sales tax, property tax, and franchise fees are projected to be \$580,400.

The Water/Sewer Fund's two largest revenue sources, water sales and sewer services, make up 91% of the revenues. For fiscal year 2007-08, water sales and sewer services are projected to be unchanged at \$542,000.

Property taxes for the City (27% of General Fund revenues) have shown growth in recent years, and this trend is expected to continue in the near future due to a strong residential real estate market. Residential construction continues to increase with single home family dwellings expecting to continue to increase. This will serve a vital role of stimulating local businesses and enhancing the City's economic stability.

Long-term financial planning. While the City's largest revenue sources have shown positive trends over the last several years, total revenues have not increased at the same level as increases in the cost of providing services. This gap between revenues and expenditures is expected to widen in the upcoming years due to increased costs for health insurance premiums, workers compensation, and general liability costs. The City is actively pursuing a number of revenue enhancements to close that gap in future years.

The City will continue to seek out expansion at the Abernathy Municipal Airport. In the recent past, the City has had two separate parties locating business operations at the airport and recent interest from another. Any place the City can recapture a portion of the O&M expenses should be given a high priority.

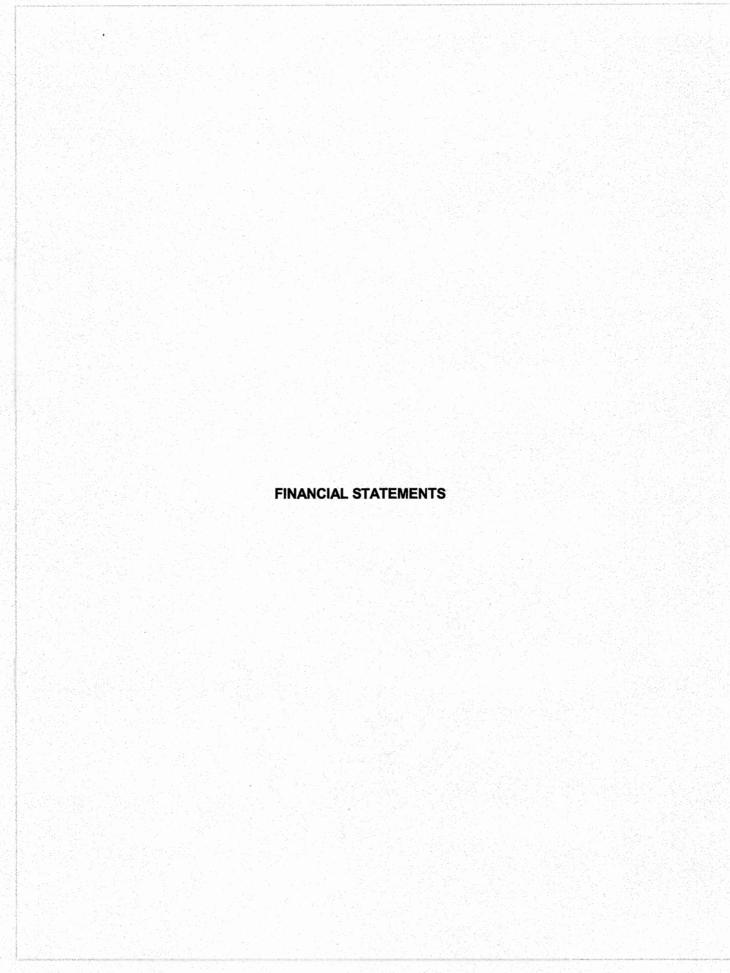

While most of the City's revenue sources have shown positive trends in recent years, the health of the City's budget, like many cities throughout the state, hinges in large part on action at the state level.

Cash management policies and practices. With the change in banking facilities to Security Bank in late 2003, the City has been able to maintain interest-bearing checking accounts. This was not the case in previous years. The City should continue to explore and take advantage every avenue of maximizing earning capacities of operating capital in a healthy environment.

The City holds a large portion of its portfolio in Certificates of Deposits. Recent economic conditions are not so promising. Interest rates have continued to move downwards over the last year. Whether or not the rates will continue to drop remains to be seen.

CONTACTING THE CITY'S FINANCIAL MANAGEMENT

This financial report is designed to provide our citizens, taxpayers, customers, and investors and creditors with a general overview of the City's finances and to demonstrate the City's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Abernathy City Manager, 811 Avenue D, Abernathy, Texas 79311.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The City of Abernathy, Texas (the City) operates under a Council / City Manager form of government. The City's major operations include police and fire protection, sanitation and recreation, public works, and general administrative services. In addition, the City owns and operates a water and sewer system.

The City's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The Governmental Accounting Standards Board (GASB) is responsible for establishing GAAP for state and local governments through its pronouncements (Statements and Interpretations). Governments are also required to follow the pronouncements of the Financial Accounting Standards Board (FASB) issued through November 30, 1989 (when applicable) that do not conflict with or contradict GASB pronouncements. Although the City has the option to apply FASB pronouncements issued after that date to its business-type activities and enterprise funds, the City has chosen not to do so. The more significant accounting policies established in GAAP and used by the City are discussed below.

A. REPORTING ENTITY

These financial statements present the City (the primary government). As defined by GASBS No. 14, component units are legally separate entities that are included in the City's reporting entity because of the significance of their operating or financial relationships with the City. The City does not have component units.

B. BASIC FINANCIAL STATEMENTS - GOVERNMENT-WIDE STATEMENTS

The City's basic financial statements include both government-wide (reporting the City as a whole) and fund financial statements (reporting the City's general fund). Both the government-wide and fund financial statements categorize primary activities as either governmental or business-type. The City's police and fire protection, sanitation and recreation, public works, and general administrative services are classified as governmental activities. The City's water and sewer services and airport are classified as business-type activities.

In the government-wide Statement of Net Assets, both the governmental and business-type activities columns (a) are presented by column, and (b) are reported on a full accrual, economic resource basis, which recognizes all long-term assets and receivables as well as long-term debt and obligations. The City's net assets are reported in three parts – invested in capital assets, net of related debt; restricted net assets; and unrestricted net assets. The City first utilizes restricted resources to finance qualifying activities.

The government-wide Statement of Activities reports both the gross and net cost of each of the City's functions and business-type activities (police, fire, public works, etc.). The functions are also supported by general government revenues (property, sales and use taxes, certain intergovernmental revenues, fines, permits and charges, etc.). The Statement of Activities reduces

NOTES TO FINANCIAL STATEMENTS

gross expenses (including depreciation) by related program revenues, operating and capital grants. Program revenues must be directly associated with the function (police, public works, etc) or a business-type activity. Operating grants include operating-specific and discretionary (either operating or capital) grants while the capital grants column reflects capital-specific grants.

The net costs (by function or business-type activity) are normally covered by general revenue (property, sales or franchise taxes, intergovernmental revenues, interest income, etc).

The City does not allocate indirect costs.

This government-wide focus is more on the sustainability of the City as an entity and the change in the City's net assets resulting from the current year's activities.

C. BASIC FINANCIAL STATEMENTS - FUND FINANCIAL STATEMENTS

The financial transactions of the City are reported in individual funds in the fund financial statements. Each fund is accounted for by providing a separate set of self-balancing accounts that comprises its assets, liabilities, reserves, fund equity, revenues, and expenditures/expenses. The various funds are reported by generic classification within the financial statements.

The following fund types are used by the City:

Governmental Funds:

The focus of the governmental funds' measurement (in the fund statements) is upon determination of financial position and changes in financial position (sources, uses, and balances of financial resources) rather than upon net income. The following is a description of the governmental funds of the City:

General fund is the general operating fund of the City. It is used to account for all financial resources except those required to be accounted for in another fund.

2. Proprietary Funds:

The focus of proprietary fund measurement is upon determination of operating income, changes in net assets, financial position, and cash flows. The accounting principles generally accepted in the United States of America applicable are those similar to businesses in the private sector. The following is a description of the proprietary fund of the City:

Enterprise funds are required to be used to account for operations for which a fee is charged to external users for goods or services and the activity (a) is financed with debt that is solely secured by a pledge of the net revenues, (b) has third party requirements that the cost of providing services, including capital costs, to be recovered with fees and charges, or (c) establishes fees and charges based on a pricing policy designed to recover similar costs.

NOTES TO FINANCIAL STATEMENTS

D. BASIS OF ACCOUNTING

Basis of accounting refers to the point at which revenues or expenditures/expenses are recognized in the accounts and reported in the financial statements. It relates to the timing of the measurements made regardless of the measurement focus applied.

1. Accrual:

Both governmental and business-type activities in the government-wide financial statements and the proprietary funds financial statements are presented on the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred.

2. Modified Accrual:

The governmental funds financial statements are presented on the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recorded when susceptible to accrual; i.e., both measurable and available. "Available" means collectible within the current period or within 60 days after year end. Expenditures are generally recognized under the modified accrual basis of accounting when the related liability is incurred. The exception to this general rule is that principal and interest on general obligation long-term debt, if any, is recognized when due.

E. FINANCIAL STATEMENT AMOUNTS

1. Cash and Cash Equivalents:

The City has defined cash and cash equivalents to include cash on hand, demand deposits, and cash with fiscal agent.

2. Investments:

Investments are stated at fair value (quoted market price or the best available estimate).

3. Capital Assets:

Capital assets purchased or acquired with an original cost of \$1,000 or more are reported at historical cost or estimated historical cost. Contributed assets are reported at fair market value as of the date received. Additions, improvements, and other capital outlays that significantly extend the useful life of an asset are capitalized. Other costs incurred for repairs and maintenance are expensed as incurred. Depreciation on all assets is provided on the straight-line basis over the following estimated useful lives:

Buildings	20-40 years
Water and sewer systems	15-40 years
Machinery and equipment	5-20 years
Automotive	7-10 years

NOTES TO FINANCIAL STATEMENTS

4. Revenues:

Substantially all governmental fund revenues are accrued. Property taxes are billed and collected within the same period in which the taxes are levied. Subsidies and grants to proprietary funds, which finance either capital or current operations, are reported as nonoperating revenue based on GASB No. 33. In applying GASB No. 33 to grant revenues, the provider recognizes liabilities and expenses and the recipient recognizes receivables and revenue when the applicable eligibility requirements, including time requirements, are met. Resources transmitted before the eligibility requirements are met are reported as advances by the provider and deferred revenue by the recipient.

5. Expenditures:

Expenditures are recognized when the related fund liability is incurred.

Compensated Absences:

The City accrues accumulated unpaid vacation and sick leave and associated employee-related costs when earned (or estimated to be earned) by the employee.

7. Interfund Activity:

Interfund activity is reported as either advances, services provided, reimbursements, or transfers. Advances are reported as interfund receivables and payables as appropriate and are subject to elimination upon consolidation. Services provided, deemed to be at market or near market rates, are treated as revenues and expenditures/expenses. Reimbursements are when one fund incurs a cost, charges the appropriate benefiting fund, and reduces its related cost as a reimbursement. Transfers between governmental or proprietary funds are netted as part of the reconciliation to the government-wide financial statements.

3. LONG-TERM OBLIGATIONS

Capital Lease Obligation

During the ended September 30, 2005, the City financed \$28,280 for the purchase of a John Deere 5220 tractor. Terms of the lease include an interest rate of 4.75% for five annual installments with the final installment due November 18, 2008. The outstanding balance at September 30, 2007, is \$11,560. Payments to maturity are as follows:

2008 \$	6,204
2009	6,204
	12,408
Less: Amount Representing Interest	(848)
\$	11,560

Revenue Bonds

The ordinance for the revenue bonds of the Water and Sewer Fund require the establishment of a Bond Sinking Fund and a Bond Reserve Fund. The Sinking Fund requires a monthly deposit of one-twelfth (1/12) of the next annual principal and interest installment. The Reserve Fund requires a monthly deposit until the fund has a balance of \$50,000. The amount in the Reserve Fund as of September 30, 2007, is \$82,298. These funds are carried on the Balance Sheet of the Water and Sewer Fund as restricted assets.

NOTES TO FINANCIAL STATEMENTS

The following is a summary of revenue bond activities for the year ended September 30, 2007, and the principal and interest requirements for the next 12 months.

	Balance			Balance	Next Twelve Months			
	10/1/2006	Issued	Retired	9/30/2007	Principal	Interest		
Water and Sewer								
Revenue Bonds -	4.45.000							
5-1-1998	\$ <u>145,000</u>	\$\$	70,000 \$	75,000 \$	75,000	\$ 1,931		

Principal obligations to maturity are as follows:

9/30/2008 Amount 75,000

The 1998 Series bonds are payable from net revenues of the Water and Sewer Fund, with final payment due in 2008. Interest is payable annually at 5.15% per annum.

Certificates of Obligation

In 2000, the City issued certificates of obligation totaling \$350,000. Proceeds from this issue were used for the purchase of land and installation of a water well. This debt carries an interest rate of 6% and matures in 2010.

The following is a summary of certificate activities for the year ended September 30, 2007, and the principal and interest requirements for the next 12 months.

	Balance			Balance		ounts Due velve Months

	\$_	58,538	

4. LITIGATION - COMMITMENTS

As of September 30, 2007, there was a lawsuit still pending against the City. Any unfavorable outcome will be covered by insurance.

5. PENSION PLAN

Plan Description

The City provides pension benefits for all of its full-time employees through a non-traditional, joint contributory, defined benefit plan in the state-wide Texas Municipal Retirement System (TMRS), one of 821 administered by TMRS, an agent multi-employer public employee retirement system.

NOTES TO FINANCIAL STATEMENTS

Benefits depend upon the sum of the employee's contributions to the plan with interest and the City-financed monetary credits with interest. At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits for service since the plan began are a percent (100%, 150%, or 200%) of the employee's accumulated contributions. In addition, the City can grant, as often as annually, another type of monetary credit referred to as an updated service credit which is a theoretical amount which, when added to the employee's accumulated contributions and the monetary credits for service since the plan began, would be the total monetary credits and employee contributions accumulated with interest if the current employee contribution rate and City matching percent had always been in existence and if the employee's salary had always been the average of his salary in the last three years that are one year before the effective date. At retirement, the benefit is calculated as if the sum of the employee's accumulated contributions with interest and the employer-financed monetary credits with interest were used to purchase an annuity.

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows (as of 4/4/07):

Deposit Rate:

5%

Matching Ratio (City to Employee)

1 to 1

A member is vested after

5 Years

Members can retire at certain ages, based on the years of service with the City. The service retirement eligibilities for the city are: 5 yrs/ age 60, 25 yrs/ any age.

Contributions

Under the state law governing TMRS, the actuary annually determines the City contribution rate. This rate consists of the normal cost contribution rate and the prior service contribution rate, both of which are calculated to be a level percent of payroll from year to year. The normal cost contribution rate finances the currently accruing monetary credits due to the City matching percent, which are the obligation of the City as of an employee's retirement date, not at the time the employee's contributions are made. The normal cost contribution rate is the actuarially determined percent of payroll necessary to satisfy the obligation of the City to each employee at the time his/her retirement becomes effective. The prior service contribution rate amortizes the unfunded (overfunded) actuarial liability (asset) over the remainder of the plan's 25-year amortization period. The unit credit actuarial cost method is used for determining the City contribution rate. Both the employees and the City make contributions monthly. Since the City needs to know its contribution rate in advance to budget for it, there is a one-year delay between the actuarial valuation that is the basis for the rate and the calendar year when the rate goes into effect (i.e. December 31, 2006, valuation is effective for rates beginning January, 2008).

NOTES TO FINANCIAL STATEMENTS

6. Deposits and Investments

Legal and Contractual Provisions Governing Deposits and Investments

The Public Funds Investment Act (Government Code Chapter 2256) contains specific provisions in the areas of investment practices, management reports and establishment of appropriate policies. Among other things, it requires the City to adopt, implement, and publicize an investment policy. That policy must address the following areas: (1) safety of principal and liquidity, (2) portfolio diversification, (3) allowable investments, (4) acceptable risk levels, (5) expected rates of return, (6) maximum allowable stated maturity of portfolio investments, (7) maximum average dollar-weighted maturity allowed based on the stated maturity date for the portfolio, (8) investment staff quality and capabilities, and (9) bid solicitation preferences for certificates of deposit. Statutes authorize the City to invest in (1) obligations of the U.S. Treasury, certain U.S. agencies, and the State of Texas; (2) certificates of deposit, (3) certain municipal securities, (4) money market savings accounts, (5) repurchase agreements, (6) bankers acceptances, (7) Mutual Funds, (8) Investment pools, (9) guaranteed investment contracts, and (10) common trust funds. The Act also requires the City to have independent auditors perform test procedures related to investment practices as provided by the Act. The City is in substantial compliance with the requirements of the Act and with local policies.

Policies Governing Deposits and Investments

In compliance with the Public Funds Investment Act, the City has adopted a deposit and investment policy. That policy does not address the following risks:

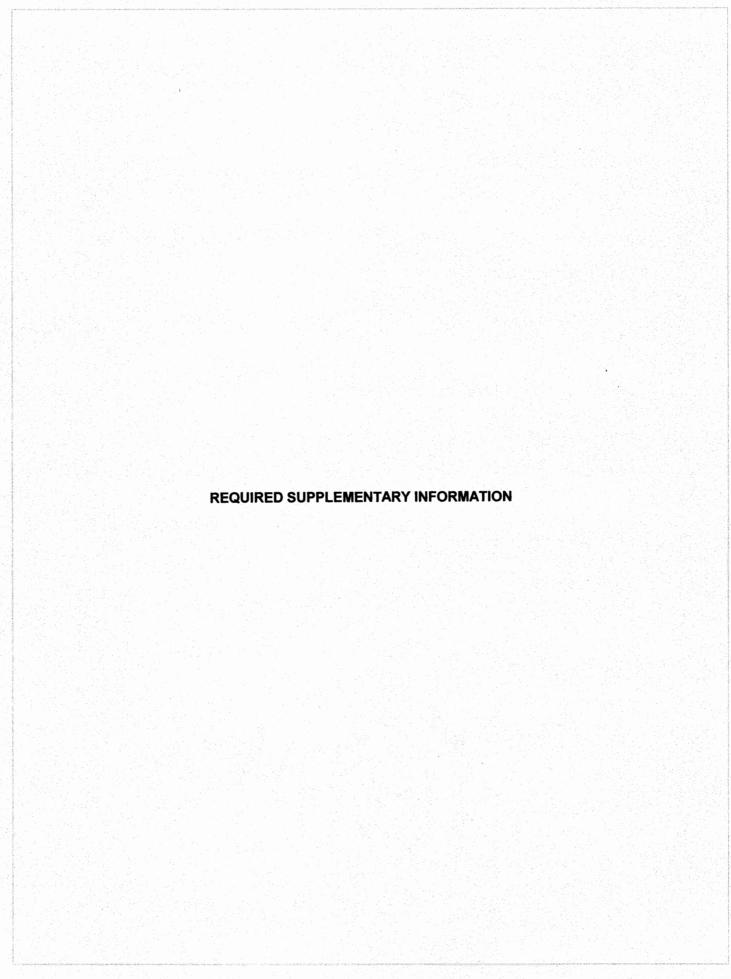

- a. Custodial Credit Risk Deposits and Investments: In the case of deposits, this is the risk that in the event of a bank failure, the government's deposits and investments in certificates of deposits may not be returned to it. The City's policy does not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits and investments, other than the following: The State of Texas requires that a financial institution secure deposits and investments made by state or local governments by pledging securities in excess of the highest cash balance of the government. The City is not exposed to custodial credit risk, for its deposits are all covered by depository insurance and pledged securities held by a third party in the City's name.
- b. Concentration of Credit Risk The investment policy of the City contains no limitations on the amount that can be invested in any one issuer. Investments in any one issuer (other than U.S. Treasury securities, mutual funds, and external investment pools) that represent five percent or more of the total entity investments represent a concentration risk. At September 30, 2007, all of the City's investments are with Security Bank which are covered by FDIC insurance and pledged securities, and as such the City has no risk.
- c. Credit Risk The risk that an issuer of other counterparty to an investment will not fulfill its obligations. The ratings of securities by nationally recognized rating agencies are designed to give an indication of credit risk. At September 30, 2007 the City was not significantly exposed to credit risk.

NOTES TO FINANCIAL STATEMENTS

- d. Interest Rate Risk Not applicable
- e. Foreign Currency Risk Not applicable

The carrying amount of the City's cash and temporary investments at September 30, 2007, approximates fair value and consisted of the following shown below:

	Primary Government
Cash in Bank \$ Certificate of Deposits	120,552 585,852
Total Cash and Investments	706,404

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Honorable Darrell Stephens, Mayor and Members of the City Council City of Abernathy, Texas

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Abernathy, Texas, as of and for the year ended September 30, 2007, and have issued our report thereon dated January 7, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the City of Abernathy, Texas' internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. Accordingly, we do not express an opinion on the effectiveness of the company's internal control over financial reporting.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified a deficiency in internal control that we consider to be a significant deficiency.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the following deficiency to be a significant deficiency in internal control:

Internal controls within the City of Abernathy, Texas are limited due to the limited number of personnel responsible for the financial records, which makes segregation of responsibilities impractical.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. The significant deficiency noted above is not considered to be a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City of Abernathy, Texas' financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

This communication is intended for the information of the City Council and management, and is not intended to be and should not be used by anyone other than these specified parties.

LUBBOCK, TEXAS 79423-1954

January 7, 2008

Honorable Mayor and Members of the City Council City of Abernathy, Texas

As part of our responsibility in the conduct of the audit for the period ended September 30, 2007, we are required to determine that certain matters related to the conduct of the audit are communicated to those who have responsibility for oversight of the financial reporting process. It is our understanding that the oversight of the financial reporting process is your responsibility, and as such this, communication is directed to you.

Auditors' Responsibility Under U. S. Generally Accepted Auditing Standards

As stated in our engagement letter dated February 16, 2007, our responsibility, as described by professional standards, is to plan and perform our audit to obtain reasonable, but not absolute, assurance that the financial statements are free of material misstatement and are fairly presented in accordance with U. S. generally accepted accounting principles. Because an audit is designed to provide reasonable, but not absolute, assurance and because we did not perform a detailed examination of all transactions, there is a risk that material misstatements may exist and not be detected by us. As part of our audit, we considered the internal control. Such considerations were solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

Significant Accounting Policies

Management has the responsibility for selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by the organization are described in Note 1 to the financial statements. No new policies were adopted, and the application of existing policies was not changed during the audit period. We noted no transactions entered into by the organization during the audit period that were both significant and unusual, and of which, under professional standards, we are required to inform you, or transactions for which there is a lack of authoritative guidance or consensus.

Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based upon management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates can be particularly

Honorable Mayor and Members of the City Council City of Abernathy, Texas January 7, 2008 Page 2

sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. We feel these estimates are reasonable for the audit period.

Audit Adjustments

For purposes of this letter, professional standards define an audit adjustment as a proposed correction of the financial statements that, in our judgment, may not have been detected except through our auditing procedures. An audit adjustment may or may not indicate matters that could have a significant effect on the organization's financial reporting process (that is, cause future financial statements to be materially misstated). Attached to this letter are the adjustments made as a part of this audit. These adjustments are considered to be significant to the financial reporting process, either individually or in the aggregate.

Other Information in Documents Containing Audited Financial Statements

We are not aware of any client-prepared documents that include the audited financial statements and that contain other information.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter that could be significant to the financial statements or the auditor's report. No such disagreements arose during the course of our audit.

Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the organization's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to contact us to determine whether the consultant has all the relevant facts. To our knowledge, management has not consulted with other accountants about auditing and accounting matters.

Issues Discussed Prior to Retention of Independent Auditors

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the organization's auditors. However, these discussions occurred in the normal course of our professional relationship, and our responses were not a condition to our retention.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties with management in performing and completing our audit.

Honorable Mayor and Members of the City Council City of Abernathy, Texas January 7, 2008 Page 3

This information is intended solely for the use of those with the oversight responsibility over the financial reporting process, including the audit committee, the City Council, and management, and is not intended to be and should not be used by anyone other than these specified parties. If you should have any questions or wish to discuss any of the items referred to above in further detail, please do not hesitate to contact our office.
